Time Hack

Briefing Duration

8-12 minutes

Demo

~10 minutes

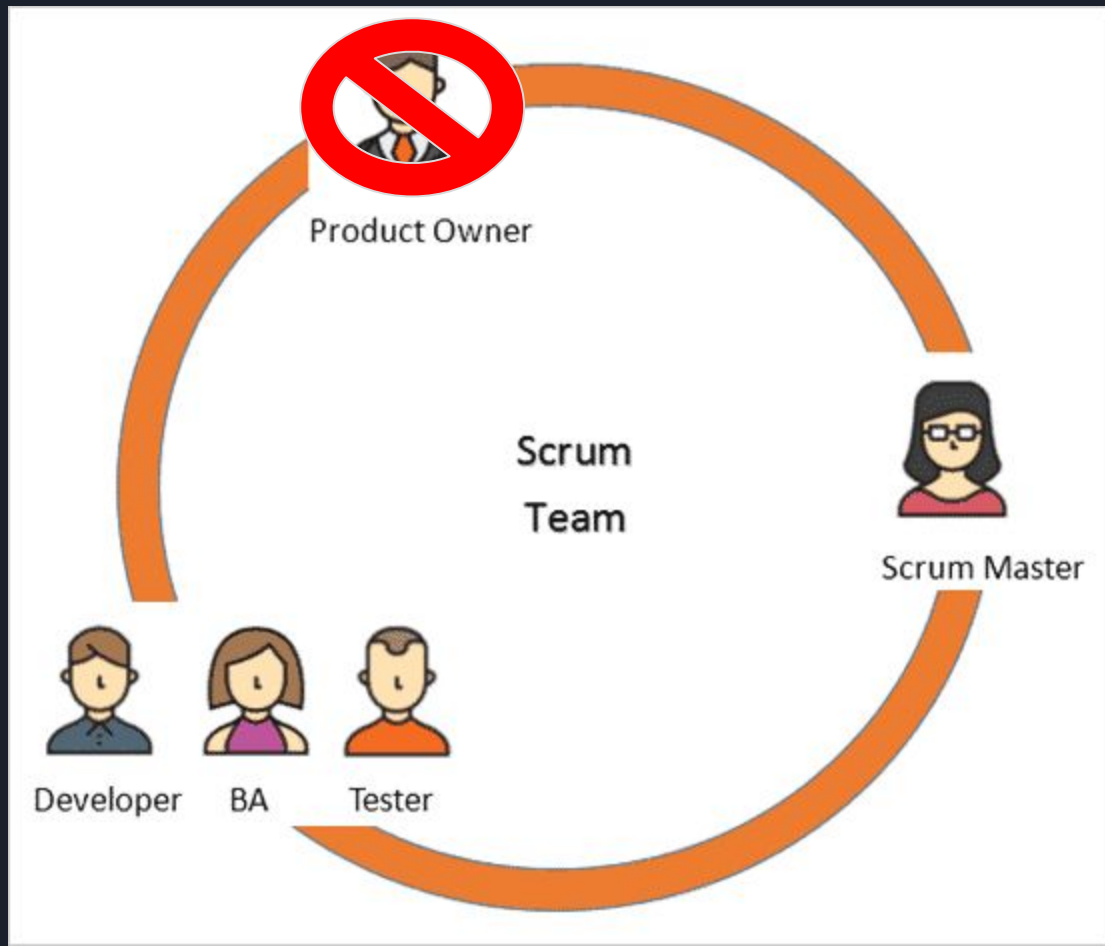

Team Positions

Scrum Master - Capt Robertson

Team Architect - 1st Lt Carrasco

Developer - 2d Lt Eaby

QA Tester - 2d Lt Santalov

Mission Objectives

Specified Objectives

- Must include at least 3 functions
- Must include at least 4 variable types to include Boolean, Number, String, Array, and Hash Tables
- Must include a while loop, for loop, and for each loop
- Must use an if/else statement and switch statement
- Must use some sort of input validation
- Use commenting throughout the script

Implied Objectives

- Game is fun!
- Game does not contain bugs/issues

Mission

Intent: Create a fun game to test your musical knowledge

Tactical End-State: Obtain **highest score** possible

Fact: Use the Top 500 most popular songs according to Rolling Stone Times. Each right answer gives **100 points***

Assumptions: Player is familiar with most songs due to popularity

Constraints: The Player must **input full artist name**. For example (The Beatles, The Smiths, etc)

Start-Game

Print-Startup

Get-RandomSong

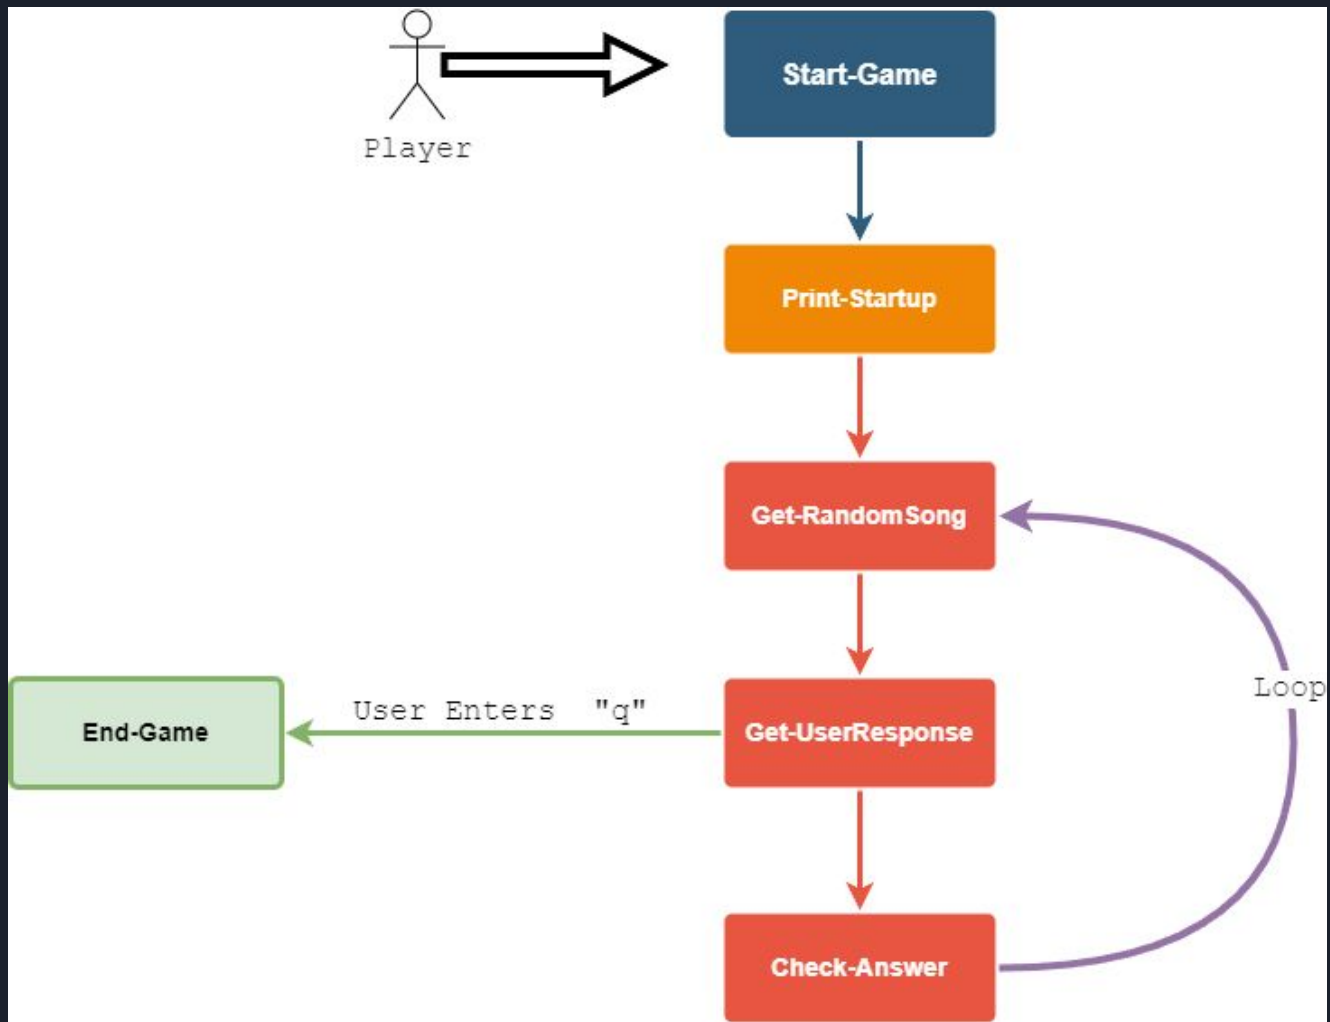

Get-UserResponse

Check-Answer

End-Game

User Enters "q"

Loop

Global Variables

```
$songLibrary = (Get-Content '\songs' | ConvertFrom-Json).data
```

```
$score = 0
```

```
$correctAnswers = @()
```

```
$streak = 1
```

```
$team = @("Chad Robertson", "Samuel Carrasco", "Seth Eaby", "Alex Santalov")
```

Start-Game Function

- Entry point to the game
- Calls Print-Startup
- Contains “while loop” block
 - Calls Get-RandomSong
 - Calls Get-UserReponse
 - Calls Check-Answer
- Calls End-Game if “q” is entered

Print-Startup Function

- Prints Welcome Banner
- Prints Game Title
- Prints Team

Get-RandomSong Function

- Fetches random song from the Library (use built-in function)

Get-UserResponse Function

- Prompt user for artist name
- Show user how to exit the game
- Store user input

Check-Answer Function

- Compare user input to correct value
- Determines what to print
 - Correct
 - Incorrect

End-Game Function

- Prints list for all correct answers
- Thanks the user for playing

Function Objective

- TO1: Must include at least three functions
- MOE: Script contains a six functions
 - TT1: Create Start-Game function
 - MOP1: 1/6 functions created
 - TT2: Create Print-Startup function
 - MOP1: 2/6 functions created
 - TT3: Create Get-RandomSong function
 - MOP1: 3/6 functions created
 - TT4: Create Get-UserReponse
 - MOP1: 4/6 functions created
 - TT5: Create Check-Answer function
 - MOP1: 5/6 functions created
 - TT5: Create End-Game function
 - MOP1: 6/6 functions created

Variable Objective

- TO1: Must include at least 4 variable types to include Boolean, Number, String, Array, and Hash Tables
- MOE: Script contains all 4 variable types
 - TT1: Create Boolean variable (\$isEmptyScore)
 - MOP1: 1/1 Boolean variables
 - TT2: Create Number variable (\$score, \$streak)
 - MOP1: 2/2 functions created
 - TT3: Create Create String variable
 - MOP1: 7/7 string variables
 - TT4: Create Hash-Map (\$songLibrary)
 - MOP1: 1/1 Hash-Map variables
 - TT4: Create Array variable (\$team, \$correctAnswers)
 - MOP1: 2/2 Array variables

Loop Objective

- TO1: Must include a while loop, for loop, and for each loop
- MOE: Script contains all loops present
 - TT1: Create a while loop
 - TT2: Create for loop
 - TT3: Create for each loop

Control Flow Objective

- TO1: Must use an if/else statement and switch statement
- MOE: Script contains all loops present
 - TT1: Create if/else block
 - TT2: Create switch statement

PACE Tools

- Primary : Visual Studio Code
- Alternate: Powershell ISE
- Contingency: Online PowerShell Editor (<https://tio.run/#>)
- Emergency: Notepad

Contingencies

- Unable to run script on instructor computer
 - Solution: Use personal laptop to run

Extras

- Getting multiple correct answers in a row increases your streak
- Higher streak serves a score multiplier
- If a user gets a score of zero a donkey is displayed
- All the correct answers the player got will be displayed at the end
- Will display right answer after an attempt

Questions?
